Notes to the Condensed Interim Consolidated Financial Statements

For the nine months ended September 30, 2016

(Unaudited - Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS

ALX Uranium Corp. (formerly Lakeland Resources Inc.) (“ALX” or the “Company”) is a publicly listed company incorporated in British Columbia with limited liability under the legislation of the Province of British Columbia. The shares of the Company are listed on the Toronto Venture Exchange (“TSX-V”) under the symbol ‘AL’, on the Frankfurt Stock Exchange (“FSE”) under the symbol “6LNN”, and in the United States of America on the OTCQX under the symbol “ALXEF”. The Company is principally engaged in the acquisition, exploration, and development of mineral properties.

On September 24, 2015, the Company consolidated their outstanding shares on the basis of one post-consolidated share for every three pre-consolidated share. All share values referenced in these consolidated financial statements are post-consolidation.

The head office, principal address and registered and records office of the Company are located at 1450 – 789 West Pender Street, Vancouver, BC, Canada, V6C 1H2.

2. BASIS OF PREPARATION

Statement of compliance and basis of measurement

These consolidated statements are prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”), applicable to the presentation of interim financial statements, including IAS 34, Interim Financial Reporting.

These consolidated financial statements include the accounts of the Company and Alpha Exploration Inc. (“Alpha”) and Alpha’s wholly owned subsidiary, ESO Uranium (USA) Inc. All significant inter-company balances and transactions have been eliminated on consolidation.

These consolidated financial statements have been prepared under the historical cost basis, except for financial instruments classified as available-for-sale (“AFS”) and fair value through profit or loss (“FVTPL”). These financial statements have been prepared under the accrual basis of accounting, except for cash flow information.

Going concern of operations

These consolidated financial statements were prepared on a going concern basis, under the historical cost convention. The Company’s ability to continue as a going concern is dependent upon the ability of the Company to obtain financing and generate positive cash flows from its operations. The Company expects that it will need to obtain further financing in the form of debt, equity or a combination thereof in the future. There can be no assurance that additional funding will be available to the Company, or, if available, that this funding will be on acceptable terms. If adequate funds are not available, the Company may be required to delay or reduce the scope of any or all of its development projects.

Approval of the financial statements

The financial statements of ALX Uranium Corp. for the nine months ended September 30, 2016 were approved and authorized for issue by the Board of Directors on November 22, 2016.

2. BASIS OF PREPARATION - continued

Significant accounting judgments, estimates and assumptions

The preparation of these consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

In particular, information about significant areas of estimation uncertainty considered by management in preparing the financial statements includes:

- The ability of the Company to continue as a going concern for the next fiscal year; and
- assessment as to whether any impairment exists in the valuation of its assets;
- impairment of marketable securities;
- recovery of amounts receivable;
- the useful life and recoverability of property and equipment;
- rehabilitation provisions;
- fair value of share-based payments; and
- deferred income tax asset valuation allowances.

3. SIGNIFICANT ACCOUNTING POLICIES

The policies applied in these condensed interim consolidated financial statements are consistent with policies disclosed in Note 3 of the financial statements for the year ended December 31, 2015. These condensed interim consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2015.

4. TRANSACTION WITH ALPHA EXPLORATION INC.

On September 25, 2015, the Company completed a Plan of Arrangement (the "Transaction") with Alpha Exploration Inc. ("Alpha") and acquired all of the common shares of Alpha. The Alpha shareholders received 0.50 of an ALX common share for each Alpha common share held, resulting in the Company issuing 15,868,875 common shares to Alpha shareholders, representing approximately 38% of ALX's total post-transaction (3 to 1 consolidation) issued and outstanding share capital. All of the outstanding Alpha options were cancelled and all of the outstanding Alpha warrants were assumed by ALX and exercisable to acquire ALX common shares, with the number of ALX common shares and warrant price adjusted, as appropriate, to reflect the consideration received by the Alpha shareholders pursuant to the Transaction agreement (1,127,694 warrants were issued).

5. EXPLORATION AND EVALUATION ASSETS

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to its mineral properties, and, to the best of its knowledge, except as described below, they are properly registered and in good standing.

i) Gibbon's Creek Property

In 2013, the Company acquired, by staking, five claims known as the Gibbon's Creek Property. Additionally, on November 27, 2013, the Company announced that it signed a Joint Venture Agreement (the "JV Agreement") with Star Minerals Group Ltd. ("Star Minerals") granting the Company an option to acquire a 100% interest in two claims located in the Athabasca Basin, near the Gibbons Creek Property. Under the terms of the JV agreement, the Company has the right to earn a 100% interest in the two claims by making cash payments totalling \$60,000 (paid) and issuing 200,000 common shares (issued) over a 12 month period. Star Minerals will retain the option of a 25% buyback for four times the exploration monies spent by the Company to the date that the buyback option is exercised. The buyback option will be exercisable at any time up to a 90 day period following the completion and publication of a NI 43-101 compliant resource estimate. The transaction was approved by the TSX-V on November 28, 2013. As of the current date the Company has satisfied the terms of the agreement and earned its interest in the property.

ii) Kelic Lake Property (acquired from Alpha)

On August 29, 2014, Alpha entered into an option agreement with Jody Dahrouge and 877384 Alberta Ltd. to acquire a 100% interest in the Kelic Lake property located in southern margin of the Athabasca Basin. To earn this interest, the Company has agreed on the following:

As at September 30, 2016, \$3,599 (December 31, 2015 - \$132,751) is due to related parties of the Company and is included in accounts payable and accrued liabilities and \$5,373 has been advanced to a related party and is included in prepaid expenses.

10. FINANCIAL RISK MANAGEMENT

The Company is exposed in varying degrees to a variety of financial instrument-related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

(a) Credit risk

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its cash balances. The Company manages its credit risk on bank deposits by holding deposits in high credit quality banking institutions in Canada. Management believes that the credit risk with respect to receivables is remote.

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company ensures that there are sufficient funds to meet its short-term business requirements, taking into account its anticipated cash flows from operations and its holdings of cash and cash equivalents.

10. FINANCIAL RISK MANAGEMENT— continued

(b) Liquidity risk - continued

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

(c) Foreign exchange risk

The Company is not exposed to foreign currency risk on fluctuations considering that its assets and liabilities are stated in Canadian dollars.

(d) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. With respect to financial assets, the Company's practice is to invest cash in cash equivalents in order to maintain liquidity. Fluctuations in interest rates affect the fair value of cash equivalents.

(e) Capital management

The Company's policy is to maintain a strong capital base so as to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Company consists of equity, net of cash and cash equivalents.

There were no changes in the Company's approach to capital management during the nine months ended September 30, 2016 or the year ended December 31, 2015. The Company is not subject to any externally imposed capital requirements.

(f) Fair value

The fair value of the Company's financial assets and liabilities approximates the carrying amount.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The following is an analysis of the Company's financial assets measured at fair value as at September 30, 2016 and December 31, 2015:
